About us

We intend to combine playfulness, usefulness and motivation in all the objects we produce and interventions in which we are involved.

These are the values with which we try to seek exclusivity in the work we produce. A work steeped in the place and time that we are. A work done in Mozambique with the materials and suggestions found around us.

From Mozambique to Mozambicans and to the world, intending on delving into modernity without forgetting the anchor of the tradition that characterizes us.
